

EC2 Storage Occupancy Report

1. EC2 Instance Details

- **Instance Name:** sss-swais-in
- **Private IP:** 172.31.1.13
- **Report Date:** 21-Aug-2026

2. Storage Summary

Filesystem	Total	Used	Available	Usage	Status
/	6.8 GB	6.5 GB	273 MB	97%	Critical
/boot	881 MB	163 MB	657 MB	20%	OK
/boot/efi	105 MB	6.2 MB	99 MB	6%	OK

3. Root Disk Usage Breakdown

The root filesystem `/` is currently at **97% utilization**, with only **273 MB available**.

Directory	Usage
/usr	2.7 GB
/home	1.7 GB
/var	1.2 GB
/root	4.9 MB
/etc	7.1 MB
/tmp	84 KB

4. Journal Usage

Archived and active system journals are using approximately:

139.6 MB

Command used:

```
sudo journalctl --disk-usage
```

5. Status

CRITICAL – High Disk Utilization

The root filesystem is at **97% utilization** with only **273 MB of free space**. This EC2 instance should be monitored closely and storage capacity should be reviewed to avoid service or application issues.

6. Commands Used for the Report

Storage Occupancy

```
df -h --output=source,size,used,avail,pcent,target
```

Directory Usage

```
sudo du -xhd1 / 2>/dev/null | sort -h
```

Journal Usage

```
sudo journalctl --disk-usage
```

7. Weekly On-Call Reporting

These commands can be used by the on-call team to check storage occupancy, identify major disk-consuming directories, and review journal usage on a weekly basis.

Note: This report reflects the storage status observed on **21-Aug-2026**.
